

Project information

The Youth Integrated Farming Initiative is the farming project inside the under construction SAYM Drug Rehabilitation Centre.

The objectives of establishing the food garden are;

- To address food insecurity, by providing food and nutritional support to rehab patients with supplies of fresh and healthy produce
- Capacitating the rehab participants with agribusiness farming skills
- Equipping the rehab participants with farm management technologies to be used when exiting the Rehabilitation centre
- Making economic use of the prime piece of land in the farm
- Putting some natural plants that provides bio-security to humans and ecosystem
- Flower garden is for the decoration
